Satta King is a term commonly used in India to refer to a type of illegal gambling or betting system. It originated from a lottery-style game and later evolved into a widespread underground betting network. Although it is popular in some regions, it is important to understand that Satta King is illegal and can lead to serious legal and financial consequences.

What is Satta King?

Satta King is a form of gambling where players bet money on numbers. Originally, the system started with betting on the opening and closing rates of cotton traded on the New York Cotton Exchange. Over time, it shifted into a purely number-based game. Players choose a number (usually between 00 and 99), and if their number matches the winning number declared, they win a large payout.

The term “King” is used for the person who wins the game.

How Satta King Works

The system is relatively simple:

1. A player selects a number from a predefined range.
2. The player places a bet with a bookie or through an online platform.
3. At a specific time, a random number is drawn.
4. If the chosen number matches the result, the player wins.

The payouts are often very high compared to the initial bet, which attracts many participants. However, the chances of winning are extremely low.

Satta King Games Names (2026)

There are many different Satta markets (games), each with its own timing and result declaration. Some of the commonly known Satta King game names include:

- Gali
- Desawar
- Faridabad
- Ghaziabad

- Delhi Bazar
- Shree Ganesh
- Disawar Morning
- Mumbai Main
- Kalyan
- Rajdhani Day
- Rajdhani Night
- Milan Day
- Milan Night
- Time Bazar
- Sridevi
- Madhur Day
- Madhur Night

Each of these markets operates at different times of the day, and players often participate in multiple games.

How to Check Satta King Results

Satta King results are usually announced at fixed times depending on the market. There are several ways people check results:

1. **Websites**: Many websites publish daily Satta results. These sites update numbers quickly after they are declared.
2. **Mobile Apps**: Some apps provide live updates and result notifications.
3. **SMS/WhatsApp Groups**: Bookies or agents often share results directly with players.
4. **Local Bookies**: In offline setups, bookies announce results manually.

Players typically search for terms like “Satta King result today” to find the latest updates.

Satta King Record

The Satta King record refers to past results of different markets. These records are maintained so players can analyze patterns and try to predict future numbers (though the game is essentially random).

Records usually include:

- Date-wise results
- Market name
- Winning numbers
- Open and close numbers (in some formats)

Many websites provide charts and history tables for users to study trends. However, it is important to note that these records do not guarantee accurate predictions.

Risks of Playing Satta King

While the game may seem attractive due to high payouts, it carries significant risks:

- **Legal Issues**: Satta King is illegal in India under gambling laws. Participating can result in fines or imprisonment.
- **Financial Loss**: Most players lose money over time.
- **Addiction**: The excitement of winning can lead to gambling addiction.
- **Fraud**: Many platforms are unregulated and may cheat players.

Legal Alternatives

Instead of illegal betting, people can consider legal and safer alternatives such as:

- Government-approved lotteries (in some states)
- Fantasy sports platforms (where legal)
- Skill-based games

Conclusion

Satta King is a popular but illegal gambling system that revolves around betting on numbers. It includes many markets like Gali, Desawar, and Faridabad, each with its own result timings. Players check results through websites, apps, or agents and often refer to past records to predict outcomes. However, the game is risky, unregulated, and illegal, making it important to stay cautious and avoid participation.

If you’re interested, I can also explain how the number system works (like jodi, panna, etc.) or how results are calculated.
